Delaware Technology Student Association

"It's good being first"

May 7, 2014

On behalf of the Delaware Technology Student Association I would like thank you for your support in making the our state conference successful. Your support has provided our students with the opportunity to apply their knowledge and leadership skills. We are sincerely grateful for your support.

The students who received awards in the state competition that was held on April 29 and 30 have qualified to compete at the national conference to apply their innovative "know and how" to compete with their peers in events such as CAD, Architectural Renovation, Video Game Design, Dragster Design, Engineering Design, Flight Endurance, System Control Technology, Music Production, Structural Engineering, Robotics and more.

We are anticipating nearly 150 participants from Delaware in Washington, DC. Our students will participate in competitions against nearly 7,000 other students from throughout the world. Attendees from Delaware will also participate in sessions to further develop and enhance their leadership skills. The first of four general sessions will be held on Saturday, June 28 with a parade of state flags and the conference will conclude on July 1 after the awards ceremony. We also anticipate that the Delaware Technology Student Association will be recognized for the combined efforts of all of our chapters to contribute to the American Cancer Society.

In closing, I would like to sincerely thank you for your investment of time and expertise to the Delaware Technology Student Association. Your contribution and support of TSA is greatly appreciated!

Professionally,

Mike Fitzgerald, State Advisor
